

Pham Viet Anh

Unity Game Developer

EDUCATIONS

Post & Telecommunications Institute of Technology

2011 - 2016

Major: IT - Software development

EXPERIENCES

Self learning.

- Making game prototypes
- Implement new features, game mode

Gear Games.

Apr 2025 - PRESENT

Frontend Engineer

- Get familiar with React Web App tech stack
- Investigate systems & make documents
- Implement features, events data tracking
- Fix bugs
- Integrate partners SDKs
- Making tools
- Monitor metrics

Nov 2024 - Apr 2025

Pixi JS Game Developer

- Making game with PixiJS
- Investigate systems & write documents
- Design core game logics
- Implement game control & animations
- Migrate into Netflix game ecosystem

Mar 2021 - Nov 2024

Unity Developer

- Investigate & make system documents
- Implement tech solutions
- Implement game mechanics
- Implement features, game modes & contents
- Making development tools

CONTACTS

 vietanhva.pva@gmail.com

 [vietanhva-linkedin](#)

[Github Portfolio](#)

- Fix bugs
- Integrate partners SDKs & third party libs
- Profiling & optimization
- Monitor game metrics

Onesoft – Rocket Studio

May 2019 – Feb 2021

Unity Developer

- Develop game meta features
- Investigate & design enemy, abilities systems
- Implement gameplay mechanics
- Bugs fixing
- Maintain Level creation tool

iWay Game Studio

Oct 2017 – Apr 2019

Unity Developer

- Making multiplayer RPG game from scratch
- Player movement & synchronize states
- Design the heroes & enemy systems
- Develop player control & Lobby meta systems

Nam Viet Technology

May 2017 – Sep 2017

Unity Developer

- Making chess & slot games from scratch

Long Tam Technology

Oct 2015 – Apr 2017

Unity Developer

- Develop some online casino games

PROJECTS

RPG MetaSlayers (Not published)

<IMAGE>

- Shooting RPG multiplayer game
- Learning Photon server
- Working with server team to implement online services: Authentication, matchmaking, syncing players states in gameplay
- Develop game meta features
- Code gameplay, player's control & skills

Chess game (2016)

<IMAGE>

- Turn based game online using Photon server
- Develop core game
- Implement gameplay logics, animations & VFXs
- Develop lobby's features: Profile, Shop, Leaderboard,...

Dragon shooter - Dragon war (2020 - 2021)

- Shoot 'em up, Bullet hell
- GooglePlay: <https://play.google.com/store/apps/details?id=com.rocket.dragon>
- Bug fixing
- Implement Boss skills & behaviors
- Implement new enemies
- Implement dragon abilities
- Making new levels
- Maintain level creation tool

Jackal Squad (2021 - 2022)

- Shooting enemies
- GooglePlay: <https://play.google.com/store/apps/details?id=com.rocket.jackal.squad> -
- Working with artist & dev team to improve performance
- Implement UI screens
- Implement enemies logic & behaviors
- Implement UI & enemy animations
- Profiling & optimization

M&M'S Adventure - Puzzle game by Tilting Point (2022)

- Puzzle game
- GooglePlay: <https://play.google.com/store/apps/details?id=com.tiltingpoint.mnms>
- Develop lobby features
- Working with art team & migrate character 3D, Character's animations
- Bugs fixing (game board, season pass, logic)
- UI revamp
- Implement new booster items
- Implement new level nodes, environment VFXs
- Implement new character animations & cut scene narratives

Bingo (2022 -2023)

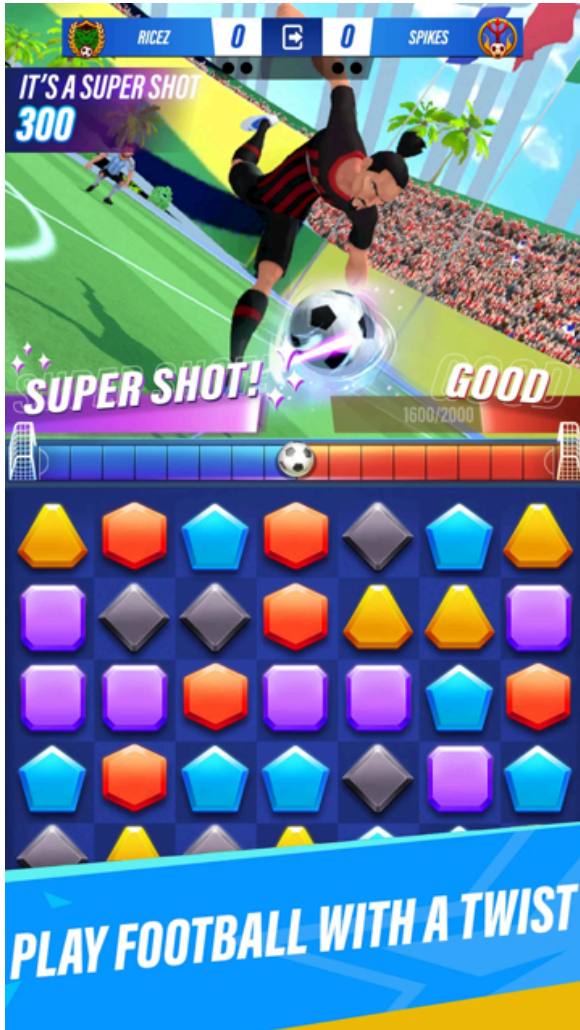

- Puzzle game
- GooglePlay: <https://play.google.com/store/apps/details?id=com.playstudios.myvegas.bingo>
- Investigate systems & making documents.
- Making development tools to support other teams
- Implement tech solutions
- Implement the Dynamic Client Content systems & migrate data to CDN
- Implement partner's plugin SDKs & third party
- Fix & maintain the Simulation system. Player Data syncing state bugs fixing.

XCOM Legends mobile by 2K Games (2023 - 2024)

- Turn based tactics & strategy
- XCOM community wiki: https://xcom.fandom.com/wiki/XCOM_Legends
- Google Play: <https://play.google.com/store/apps/details?id=com.iridiumstarfish.butler>
- Implement new features
- Implement new PvE game mode, game contents
- Implement new UI/ animations & polish
- Maintain systems (FTUE, Events, Heroes, Items,...)
- Bugs fixing

Match & Score (2024)

- Puzzle, Match-3
- GooglePlay:
 - <https://play.google.com/store/apps/details?id=com.alleylabs.matchscore>
- Implement features, bugs fixing
- Implement PvE Cup tournament game mode
- Profiling & optimize game performance
- Work with server API & blueprint data via ProtoBuf

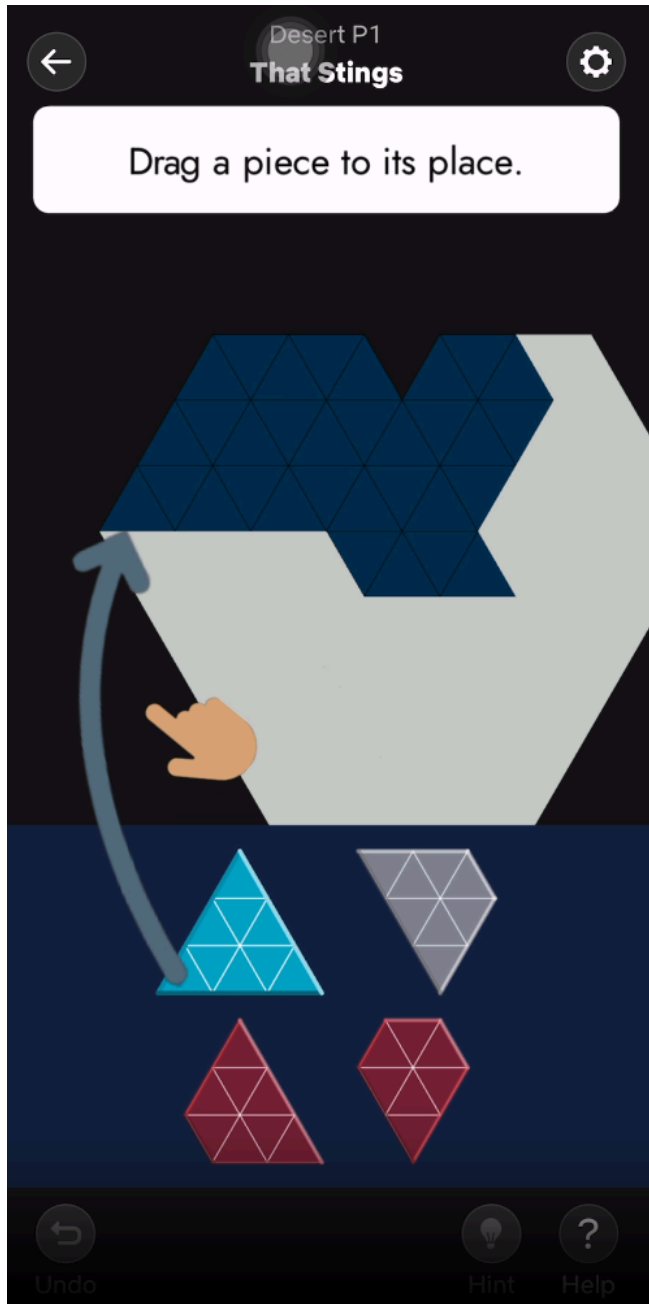

Gangster Survivor (2024)

- Free shooting survivor, GTA-like
- GooglePlay:
 - <https://play.google.com/store/apps/details?id=com.alleylabs.gangstersurvivor&hl=en>
- Implement features, bugs fixing
- Implement the character attacking systems with multiple weapons/slots in game.
- Implement the Heat rating system (Enemy waves spawner). Increase & decrease the match tempo.
- Implement the Unit re/despawning system, based on camera & player behaviours.

- Implement enemies & bosses
- Implement new weapons
- Profiling & optimize game performance
- Work with GameDesigner to define blueprint data via ProtoBuf

Tangram v2 by NextGames - Netflix (2025)

- Puzzle game
- Making in PixiJS
- Research the core game
- Implement core game logics
- Develop FTUE, Hint systems
- Implement UI & animations
- Working with teams to polish input controls
- Migrate the game into Netflix ecosystem
